

Working With the Dataset

Exploration of Data

Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dash Board
--------------	--

Exploration of Data relationships among the values is presented along with plotting of Average Age for different Chest Pain Types. For visualizing it, we will require the following data:

- * Sex
- * Age
- * Chest Pain Type.

From this data, we will be plotting "Horizontal Bar Chart" to present the average age of people experiencing the same type of chest pain.
